Counters & showcase

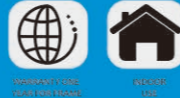

NEW
PRODUCT

Folding oxydic aluminum poles are portable and not easy to scratch.

This smart & outstanding portable tower is made of medium density fiberboard(MDF), aluminum poles and Plexiglass display boards, covered with polyester banner. Folding oxydic aluminum poles are lightweight, portable and not easy to scratch. MDF base with antiskid pads is available for wet floor. Frosted Plexiglass board is wearing proof & corrosion resistant and with excellent transparency to display products. It could also be used as trade show counter without Plexiglass boards.

STRONG VELCRO FABRIC POP UP BANNER Features

Velcro fabric pop up display is one of the traditional tradeshow displays in the E.U. & U.S. market. So far, most of the velcro fabric pop up display in the market is made of square aluminum poles or round poles (thickness=0.8mm,dia=12mm), but ours are made of poles (thickness=1mm,dia=17mm).It's connected by square molded heads and POM materials, much durable and easier to assemble. Onepiece off fabric polyester banner is skillful stitched by experienced workers, smooth, even and wrinkle free. Both the banner and frame are sewn with Velcro . Banner is printed by heat transfer with advanced equipment from Japan and environmental ink from Italy, rich-colored & colorfast & recyclable. Everything could be packed into carrying bag or case and portable delivery to anywhere for

Canada's all kinds of tradeshows.

Details

Features

Pop Up A frame banner is one of the most popular outdoor advertising signs in the EU & U.S market. Structure is made of spring metal frame, which makes the unit more flexible, portable & durable. Skillful stitching for the 2pcs fabric banners and even whole unit makes the images wrinkle-free. Top of frame is across better to build the whole banner stability and the 2 banners could be printed with the same or different images. This item is greatly used in various tradeshows, sports events & functions, being a other good choice.
